These shafts were blocked by limestone "doors" with eroded copper "handles. Nevertheless, a few of the casing stones from the lowest course can be seen to this day in situ around the base of the Great Pyramid, and display the same workmanship and precision that has been reported for centuries.

His first attempt, the Collapsed Pyramid at Meidum, failed because he departed. Petrie concluded: "but these relations of areas and of circular ratio are so systematic that we should grant that they were in the builder's design". In regard to those that come before: I was summarizing Herodotus there, whom subsequent research has indeed proved to have been incorrect on a number of points. The greater number of passages and chambers, the high finish of parts of the work, and the accuracy of construction all distinguish it.

The tools were the wooden wedge, the inclined plane, the pulley, logs as wheels

guys have discovered a remarkable thing. Egyptologists from the 19th century CE onwards have recognized that the Great Pyramid was looted in antiquity and, most likely, during the time of the New Kingdom c.
